

Rites Solar powered billboard system is a cost-effective and environment friendly way to get your message on a billboard with the use of a solar-powered light that illuminates your signage. These solar lights fixtures can put out as per size of billboard. However, solar billboard lighting has a low upfront cost as well as low maintenance costs. In just a few months, the investment can pay for itself, increasing profits.

## Eco-Friendly

The harvesting and burning of fossil fuels in the production of electricity is a major contributor to the current global warming situation and crisis, and one of the largest contributors to the pollution of the Earth. Using Solar Energy is a great way to keep away polluted electrical power from the utility company, and show your community, employees, and clients that you are green, clean, and looking out for their best interest. **Rites Solar Billboard Lights** is the only choice for you.
